## IV – FIRST AID MESURES

### After eye contact :

Rinse opened eye for several minutes under water or neutral saline solution for at least 15 minutes. Seek medical attention.

### After skin contact :

Take off immediately all contaminated clothing, and wash immediately with plenty of water, and with soap. If skin irritation persists seek medical attention.

### After inhalation :

Remove casualty to fresh air and keep at rest

### Most important symptoms and effects, both acute and delayed :

To the best of our knowledge, the chemical, physical, and toxicological properties have not been thoroughly investigated.

## V – FIRE FIGHTING MEASURES

### Suitable extinguishing agents :

CO2, extinguishing powder

### Special Firefighting Procedures :

Firefighters should wear full protective equipment and NIOSH approved self-contained breathing apparatus.

Unusual Fire and Explosion Hazards : Vapours may travel back to ignition source. Closed containers exposed to heat may explode. Extremely flammable.

## VIII – EXPOSURE CONTROLS AND PERSONAL PROTECTION

### Exposure controls :

Appropriate engineering controls

General industrial hygiene practice.

### Personal protective equipment :

#### Personal Protection- Respiratory :

Respiratory protection not required. For nuisance exposures use type OV/AG (US) or type ABEK (EU EN 14387) respirator cartridges. Use respirators and components tested and approved under appropriate government standards such as NIOSH (US) or CEN (EU).

#### Personal Protection - Eye :

Wear chemical tight goggles. Provide an eyewash station immediately accessible to the work area. Use equipment for eye protection tested and approved under appropriate government standards such as NIOSH (US) or EN 166 (EU).

#### Personal Protection - Hand :

The selected protective gloves have to satisfy the specifications of EU directive 89/686/EEC and the standard EN374 derived from it. Handle with gloves. Gloves must be inspected prior to use.
